EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Katherine Pauley on 11/29/2004.

The application has been amended as follows:

- In claim 1, line 9; "an outer" has been changed to --the outer--.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

- With regard to claims 1 and 20, as the closest reference, Ohyama et al (US 5,995,467) shows an elastic displacement portion in guiding system, **but fails to show** the elastic displacement portion is bent from a direction substantially parallel to the axial direction of the supporting shaft to a direction substantially orthogonal to the axial direction of the supporting shaft, thereby energizing the engagement portion in the radial direction of the supporting shaft.

Applicant shows this structure in Fig. 9, and assets that by using this arrangement, no looseness due to any vibration or shock is generated in the engagement portion for supporting the shaft and the supporting shaft can be securely fixed (Specification p. 20, lines 16-18).

- With regard to claim 11 and 24, as the closest reference, Ohyama et al (US 5,995,467) shows that the optical pickup further has a cover 80 which has an

aperture 82 formed therein at a position facing the objective lens and which is adapted for at least covering the objective lens, **but fails to show** wherein the opening/closing portion 76 **moves on** the cover between the position for opening the facing surface and the position for closing the facing surface, thereby opening/closing the aperture.

Applicant discloses that the opening/closing portion is an opening/closing plate 58, which is integrated on the slider (Fig. 7) and it moves on the cover; therefore, it is possible to precisely control the operation of opening/closing the aperture for the lens (Specification, p. 31, line 1-3).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tianjie Chen whose telephone number is (703) 305-7499. The examiner can normally be reached on 8:00-4:30, Mon-Fri.
